VOL. 13 NO. 4 | Lancaster Farming, Saturday, December 23, 1967 | $2 Per Year

Hertzler Cow Champion At Chicago Show

Conewago Reflection Trudy, a four-year-old Holstein owned by Conewago Farms, 2623 North Market Street, Elizabethtown, won Senior and Grand Championship honors in the female Holstein division of the Chicago International Dairy Show, November 24.

Carl Hertzler, co-owner of the local farm, which borders Lancaster County, said it was the first time a Pennsylvania cow ever won the grand championship at the nationally known show.

With a rating of 'excellent-92," the animal was also nominated for All-America four-year-old 1967.

Previously, the cow had won the reserve All-Pennsylvania three-year-old heifer competition in 1966, and fourth place in a three-and four-year-old dry cow contest in a 1966 Pennsylvania All-American show.

She placed first in the three-and four-year-old dry cow class and won the reserve senior and reserve grand championship for a Pennsylvania cow in the state Black and White contest in 1966 also.

Conewago Farms is operated by Warren Hertzler and his son, Carl Hertzler.

County Heifer Places

Also taking Chicago International Dairy Show honors was Penn prings Bill Topper, shown by Susan Ann Kauffman, Elizabethtown R. D. 1.

The animal won second place in the junior yearling heifer competition, and was nominated for All-American in the junior class for 1967.

SUPPER FOR TUTTIE. Nine-year-old Debra Landis, daughter of Mr. and Mrs. James L. Landis, 1312 Shreiner Rd., Lancaster, feeds her 80 pound calf that is a project in the 1968 4-H Veal Production Club that started this week. Debra is the youngest member of the club. L. F. Photo

Veal Calf Club Starts Second Year

A fairly new 4-H club was started this week in Lancaster County. Known as the 1968 4-H Veal Production Club, it was formed last year with seven members and has increased to 17 members this year.

The club is designed to run about ten weeks, and the rules for raising the calves are very strict. The reason for this is, according to Victor Plastow, Associate Agricultural Agent, that even if the calf only eats a little bit of shavings from the pen or licks a water pipe, etc., the veal meat may be discolored.

So the calves must be kept on a raised slatted stall with no bedding They must be fed a high fat all milk-product replacer

The members were to obtain a calf born between Dec. 10 and 20

A roundup will be held the latter part of February at New

New Potato Variety Found Superior For Food Processing

The availability of a new potato variety especially bred to meet the needs of both growers and food processors has just been announced by the U S Department of Agriculture in conjunction with the Pennsylvania Agricultural Experiment Station.

The new potato, as tested by the Wise Potato Chip Company of Berwick, Pa. has been found to have especially high specific gravity and excellent chipping qualities Cooperative research by Wise, which helped to develop the new variety, and Penn State University, has established that it has a combination of qualities seldom found in one potato.

"One of the most desirable properties of this new potato," says James Watts, Wise's company horticulturist, "is its ability to process into light colored chips under a wide range of conditions, including storage at 50 to 55 degrees Fahrenheit. In addition, it requires less storage and reconditioning after harvest. We like the fact that the shape is round to oblong. This, and the white skin and shallow eyes, makes these tubers particularly suitable for the manufacture of an even grade of potato chips."

The new potato has been named Lenape after the Lenni-Lenape tribe of the Delaware Indians who once lived in Pennsylvania. Main growing characteristics include medium-late maturity, medium resistance to Verticillium wilt, and good resistance to late blight, tuber symptoms caused by stem-end browning, net necrosis following leafroll infection, and mild mosaic

In establishing other desired

Winter Small Game; Archery Season Open December 26

Small game and bow hunters get their final chance to be afield during the eleven-day seasons starting December 26

Squirrels, grouse and rabbits will be "in season" starting the day after Christmas and ending Saturday, January 6. Archers will also get their final crack at deer of either sex during the same period.

The season for snowshoe rabbits (varying hares) also opens on December 26, but the season for this species ends on Jan. 1.

Daily bag limits in effect during the regular seasons will apply during the late seasons. Harvests of small game during the regular seasons are included in the total limits for all seasons. For small game the daily and season limits follow: squirrels, 6 daily and 30 per season; ruffed grouse, 2 daily and 10 per season; cottontail rabbits, 4 daily and 20 per season; hares (snowshoe rabbits), 2 daily and 6 per season.

Only one deer may be taken by a hunter during each license year. A bowman must possess

Animal Nutritionist Discusses Dairymen's Filled Milk Problem

An animal nutritionist started his dairy seminar Tuesday afternoon by warning farmers about the serious threat of filled milk to the dairymen

Dr. K L. Dolge, Animal Nutritionist for Agway, told a group of 75 farmers and cooperative representatives, at the Blue Ball Fire Hall. "I doubt if you know how serious this can be"

Dolge said the bad part about it is that the filled milk product can be manufactured for $3 16 per hundredweight, and can sell to the store for 29 cents a half-gallon "The store's suggested retail price is 39 cents a half-gallon," he said. "The store makes more on it than milk"

(Continued on Page 12)

Plastow Lists Reason For Low Milk Output

Victor Plastow, Associate Agricultural Agent, recently discussed some of the reasons for a fall milk production slump being experienced in many Lancaster County dairy herds. "Some dairymen depended too heavily on pastures in late summer and fall," he said "In addition hay quality is considerably lower and the forage supply has resulted in reduced levels of grain feeding and a tendency to be more lenient in culling low producers and problem cows."

In a letter addressed to dairymen, Plastow said:

"Fall forage generally does not come up to expectations based on its fineness and high protein content. Forages tested to date suggest that the T.D.N. content of hay may be as much

Zsa Zsa Has Third 1000 lb. Butterfat Record

Brattleboro, Vt — Another official production record exceeding a half ton of butterfat has been completed by Blossomelle Zsa Zsa 5051343, (EX), a Registered Holstein cow owned by Herbert and Rhelda E Royer, Lancaster. This is the third time that "Zsa Zsa" has achieved the 1,000 lbs butterfat production level in a single lactation This record ranks among 2,370 similarly completed by Registered Holstein cows on official test.

The Pennsylvania Holstein's official record of production totalled 25,690 lbs. of milk and 1,029 lbs. of butterfat in 305 days. She started her lactation at the age of 6 years and 11 months and was milked three times daily

Blossomelle Zsa Zsa was bred in the Royer herd. She was sired by Osborndale Ivanhoe 1189870 (EX), a bull that has earned a Gold Medal Sire recognition.

Pennsylvania State University supervised the weighing and sample testing of her production in cooperation with the Dairy Herd Improvement Registry program of the Holstein-Friesian Association of America

From Where We Stand . . .

The Creator Visits The Earth

St. Luke — Chapters I and II

And the angel Gabriel was sent from God unto a city of Galilee, named Nazareth, to a virgin espoused to a man whose name was Joseph, of the house of David; and the virgin's name was Mary.

And the angel came in unto her, and said, Hail, thou art highly favoured, the Lord is with thee; blessed art thou among women.

And when she saw him she was troubled at his saying, and cast in her mind what manner of salutation this should be.

And the angel said unto her, Fear not Mary; for thou hast found favour with God.

And, behold, thou shalt conceive in thy womb, and bring forth a son, and thou shalt call his name JESUS.

He shall be great, and shall be called the Son of the Highest; and the Lord God shall give unto him the throne of his father David and he shall reign over the house of Jacob forever; and of his kingdom there shall be no end.

Then said Mary unto the angel, How shall this be?

And the angel answered and said unto her, The Holy Ghost shall come upon thee, and the power of the Highest shall overshadow there, therefore also that holy thing which shall be born of thee shall be called the Son of God.

. . . And it came to pass in those days, that there went out a decree from Caesar-Augustus, that all the world should be taxed.

And all went to be taxed, every one into his own city.

And Joseph also went up from Galilee, out of the city of Nazareth, into Judea, unto the city of David which is called Bethlehem; (because he was of the house and lineage of David) to be taxed with Mary his espoused wife, being great with child.

And she brought forth her first-born son, and wrapped him in swaddling clothes, and laid him in a manger; because there was no room for them in the inn.

And there were in the same country shepherds abiding in the field, keeping watch over their flocks by night.

And lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them; and they were sore afraid.

And the angel said unto them, Fear not; for, behold, I bring you good tidings of great joy, which shall be to all people.

For unto you is born this day in the city of David a Saviour, which is Christ the Lord.

And this shall be a sign unto you; Ye shall find the babe wrapped in swaddling clothes, lying in a manger.

And suddenly there was with the angel a multitude of the heavenly host praising God, and saying, Glory to God in the highest, and on earth peace, good will toward men.

And it came to pass, as the angels were gone away from them into heaven, the shepherds said one to another, Let us now go even unto Bethlehem, and see this thing which is come to pass, which the Lord hath made known unto us.

And they came with haste, and found Mary, and Joseph, and the babe lying in a manger.

And when they had been it, they made known abroad saying which was told them concerning this child.

And all they that heard it wondered at those things which were told them by the shepherds.

And the shepherds returned, glorifying and praising God for all the things that they had heard and seen, as it was told unto them.

Envy provides the mud that failure throws at success. — N. Y. Globe

Oh, yes, and did you hear about the man who picked up a carton of artificial milk by mistake, and tried to unload the imitation on Tabby.

You guessed it, the cat wouldn't touch the stuff.

Weather Forecast

The five-day forecast for the period Saturday through next Wednesday calls for temperatures to average above normal. Colder at the beginning of the period and milder by Monday. The daytime high is expected to be in the upper 30's to 40's and the over-night low in the low 20's to low 30's. Normal high temperature is 39, low is 24.

Precipitation may total one-half inch melted. Chance of snow flurries over the North mountains Saturday and showers Monday and again Wednesday.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons.

BY LAWRENCE W. ALTHOUSE

CHRISTMAS

Lesson for December 24, 1967

Background Scripture Malachi 3 1-4, Micah 5 2 4, Isaiah 9 2 7
Devotional Reading Isaiah 9 2-7.

I am not at all sure that you ought to read the background scripture for this week's lesson—not until Christmas is well over, at least.

That may sound like strange advice, but I know what Christmas means to most of us and I would hate to have yours spoiled for you. What I'm trying to say is that the book of Malachi doesn't have a very Christmasy feeling about it. In fact, there are some parts of it that might, if taken seriously, take all the Ho-Ho-Ho right out of our holidays.

Rev. Althouse

Season's Greetings

So why not skip the lesson this week and immerse yourself in the sentiments of the Christmas cards that come your way. They are practically guaranteed to be completely inoffensive to everyone. I can assure you that there isn't likely to be any Malachi on them.

Of course, if you are one of those who delights in reading what you've been advised not to read, you may very well turn to Malachi all the more quickly. I realize, however, that you are not that type — (though if you were, Malachi 3:1-4 is the passage I had in mind).

Perhaps you are just a little bit curious as to what could be so upsetting about the Bible. I mean, we think of this book mostly in terms of inspiration, comfort, solace, beauty, etc. This is particularly true of the Christmas stories: "good will," "peace on earth," and all of that.

Actually, Malachi 3 (RSV) begins encouragingly enough: **"Behold, I send my messenger to prepare the way before me, and the Lord whom you seek will suddenly come to his temple; the messenger of the covenant in whom you delight, behold, he is coming, says the Lord of hosts."**

Holiday Wishes

Nothing very threatening there: the coming of the Messiah. Of course, there is one little inaccuracy: ". . . will suddenly come . . ." With department stores heralding Christmas since September, I don't think Malachi's "suddenly" is quite accurate.

But of course, Malachi goes on (the trouble with most prophets is that they don't know when to stop!). It's what follows that can turn your mistletoe purple: **"But who can endure the day of his coming . . ."** — (Not at all a reference to the long shopping season) — **"and who can stand when he appears?"**

You see, the people of Judah rejoiced at the first part of Malachi's vision: the messenger was coming . . . hooray! They had waited so long, so patiently.

But now what is this Malachi is saying: **"For he is like a refiner's fire . . . and he will purify the sons of Levi and refine them like gold and silver, till they present right offerings to the Lord".** (Malachi 3:2-3RSV). A refiner's fire . . . in the creche?

Merry Christmas

This time of the Messiah's coming, this time of rejoicing and fulfillment would also be, Malachi said, a time of challenge and change. The messenger of God would purify the people, particularly the priests! Presumably the process of purification would not be without some pain and anguish, some radical changes.

You see now why Malachi is not recommended to replace "'Twas The Night Before Christmas . . ."? If Christmas means more than just the "Hooray! Jesus has come with the goodies!", if it means judgment, change, repentance, rebirth, then I'm not sure we want any part of it. And that's the trouble, Christmas is really a challenge. The baby Jesus becomes the Christ of the dusty road, the noisy market place, the harlot's home, the prisoner's cell. And the invitation he gives us is not to join him in the security of the crib, but to be vulnerable on a cross.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service)

NOW IS THE TIME . . .

By Max Smith

Lancaster County Agent

To Use Soft Corn . . .

Local growers who have corn on hand that is not mature and dry enough to store in the normal crib, might use it as high moisture ground ear corn in the silo, or permit fattening hogs to run into the field and eat the corn. Since this corn is too wet to store, and would be very expensive to dry, these methods could get some return from it. The high moisture corn could be ground and put on top of other types of silage.

To Use Farm Records . . .

Farm records should not only be used for income tax purposes and to realize the financial condition of the farm business, but to plan for the future. Farm planning and management is very important and good records should be used to identify the successful enterprises as well as those that lost money. Spend some time on the records for a better understanding of the business and where you are going.

To Control Parasites . . .

Many groups of both cattle and hogs are carrying high body lice infection. If this condition is permitted to further develop during the winter months, the animals will become unthrifty and will not make efficient body gains or milk production. Several treatments two weeks apart may be needed in severe cases to eliminate the lice. Parasite infected cattle are not the most profitable; get rid of the lice and make greater profits.

CHRISTMAS

At Christmas we rejoice anew in the wonder of that Holy Night when a Child was born in a humble manger, bringing hope to all the world.

At Christmas we gladly greet our friends, with all good wishes for health, happiness and a holiday season filled with many joys and blessings.

(Continued from Page 1)

as 4-7 percent lower this year. This is expected since forage quality usually is lower in wet seasons A high proportion of this year's hay was subjected to considerable weathering. The protein content of some hay is as much as 3-5 percent lower than that made during drier seasons.

Tests show that corn silage is running 7-12 percent higher in moisture than experienced during recent drought years. In some cases it takes 4-5 pounds of corn silage to equal 1 pound of hay, rather than the 3 pounds, as commonly used. Grain feeding has dropped about 1 pound per head daily in numerous herds.

"If all of these factors resulting in lower nutrient intake occur simultaneously in a herd, production could be expected to drop by about 4-6 pounds or more per cow daily Failure to gradually accustom cows to corn silage and lack of protein on high corn silage rations also may be contributing to the production decline in many cases.

"Instead of feeding less concentrates, dairymen with a production slump should try increasing concentrate feeding by 1 pound of grain for each 2 pounds of milk drop below expected levels For example, if cows are producing 4 pounds less milk daily than expected, increase grain feeding by about 2 pounds per head daily and note response. Cows should increase production within 2 days following the increases, if energy or TDN intake is one of the contributing factors.

"Many rations high in corn silage may make necessary the use of a concentrate mixture containing 18-20 percent protein or more, if urea has not been added at ensiling. If lack of protein is suspected, try top feeding about 1 pound of soybean oil meal per head daily, especially to cows fed grain at average or lowered levels. When this is not convenient, raise the protein content of the concentrate mixture by about 2 percent per week as long as a profitable response is obtained. Make certain that feedlots of corn silage or weathered hay are getting sufficient amount of vitamin A and especially vitamin E supplementation.

"A wet growing season can be expected to increase production problems but ease health and reproductive ones. Dry seasons generally improve production levels but increase health and reproductive problems."

● Veal Calf

(Continued from Page 1)

Holland All calves will be shown by weight class and graded.

The youths in the club are: Marlene, Marilyn and Raelene Harbold, all of Mt Joy R1; Debra Jo, Kim Louise, and Robert D. Hess, all of Strasburg R1; Ed Hollinger, Mt. Joy R1; Linda and Sue Kauffman, Elizabethtown R1; Thomas Kreider, Quarryville R1; Debra Landis, 1312 Shreiner Rd, Lancaster; Richard Mellinger, Strasburg R1; Scott Mull, Quarryville R1; Barry Shenk, Elizabethtown R3; Ken Stern, Middletown; Robert Zimmerman, Denver R1 and Janice Delong, Peach Bottom R2.

Robert Kauffman, Elizabethtown R1 is the club leader.

BATTERIES HAVE EXTRA LOAD IN WINTER

It is important to have batteries in tractors, trucks and autos fully charged, since winter puts an extra load on them reminds extension agricultural engineers at Penn State University.

● Garden Spot

(Continued from Page 1)

Agriculture Teacher at the high school will teach welding in the various positions, on different kinds of metal, welding cast iron, hard surfacing, cutting, and brazing with an arc welding.

Everyone who attends will receive a certified diploma if they attend all five sessions. A fee of $5.00 will be charged for the course and all materials needed will be provided free of charge.

The course is based on instruction developed by the Lincoln Electric Company who makes arc welding equipment and has been conducting welding schools since 1917. The Farmersville Equipment Co. will sponsor the course.

The welding school will be limited to twenty persons. Anyone interested in the course should contact the Agriculture Department of the Garden Spot High School by January 5, 1968.

● New Potato

(Continued from Page 1)

qualities, the USDA last year compared the Lenape's yield and specific gravity to the performance of the standard Ketahdin and Kennebec varieties. Taking an average from five test locations — Maine, North Carolina, New Jersey, Pennsylvania and Texas — the results gave Lenape a clear lead in specific gravity over the other two varieties, while its mean yield per acre ran slightly under Kennebec's and considerably higher than Ketahdin's.

The Lenape was developed from a cross of two USDA seedlings, 41756 and B3672-3. The first true seed was grown in 1959 under pedigree number B5141-6 at the Crops Research Division of the Agricultural Research Service at Beltsville, Md. In addition to the Wise Potato Chip Co., many State Experiment Stations cooperated with the USDA and the Pennsylvania Agricultural Experiment Station in its selection and development. Among the scientists mainly responsible for the success of the new variety are Dr. R. V. Akeley, potato investigation leader at the USDA facility at Beltsville, and Dr. W. R Mills, professor of plant pathology at Penn State University.

Foundation seed of the Lenape potato is now being produced by the State Seed Potato Board of Maine. Seed potatoes for general use are expected to be available for the 1969 planting.

● Small Game

(Continued from Page 1)

an archery license in addition to a resident or non-resident hunting license.

Daily hunting hours for all game during the late seasons are from one-half hour before sunrise until sunset.

Field reports indicate that there is still a plentiful supply of small game, and archers should have little trouble finding deer.

Local IH Servicemen Attend School

John Boose, Roy Weaver, Eby Hershey, and Charles B Hoober Jr., Servicemen for C. B Hoober & Son, International Harvester Dealer in Intercourse, Pa. have completed an intensive one-week training course on tractor hydraulics and hitches, diesel fuel injection systems, power steering, hydraulic pumps, valves and cylinders at International Harvesters Training Center near Tifton, Georgia.

Classes are small enough for each serviceman to receive ample personal direction. Each serviceman "learns by doing" By actually trouble-shooting the equipment and working with it, they are prepared to quickly diagnose and correct service problems. This new and practical experience can be put to use as soon as each man returns home. The service training center was originated to enable dealer service specialists to acquire training in professional skills needed to meet today's demanding requirements of complex farm and industrial machinery.

Trophy Bucks Turn Up At Check Stations

A dozen or more trophy bucks believed to be big enough for entry in the Boone and Crockett record book were examined at the Pennsylvania Game Commission's four deer checking stations during the first week of the 1967 buck season.

The Boone and Crockett Club is the internationally-recognized organization which compiles official records of North American big game trophies.

About 4,000 bucks were examined at the deer checking stations last week, and a large number of fine specimens turned up. Many whitetails could not be examined because jaws were frozen shut.

The largest deer checked was a 188-pounder taken in Susquehanna County, Westmoreland County also produced several deer weighing over 180 pounds, and a 13-year-old Sandy Lake youth, Mark B. Voorhees, tagged a 12-point, 4½-year-old trophy which weighed 180 pounds. The big buck was taken in Venango County.

Several 7½-year-old deer were recorded. The lightest whitetails examined were 1½-year-old spike bucks weighing 68 pounds. Among the unusual was examination of one set of antlers still in the velvet.

Veteran biologists concluded that as a whole this year's racks were "the nicest we've seen in years," and 1½-year-old deer were heavier than normal.

Game Commission Research Chief Harvey A. Roberts thanked hunters for their splendid cooperation in taking the time to have their trophies examined. He pointed out that this is one of the Commission's chief tools in compiling data on the deer herd and hunters are the ultimate beneficiaries through information gained in the operation.

WOODLOT SAFETY

Edward P. Farrand, extension forester at Penn State University, cautions farmers to be careful while working in farm woodlots this winter. Make sure axe handles are strong and solidly mounted; shut off the motor of the power chain saw while filling with gas. Be careful with footing, and beware of falling trees

Breakfast Breads

SPENCE

If you are having guests in your home over the holidays a leisurely breakfast will be one of the most enjoyable times of the day. And of course a leisurely breakfast must boast lots of good coffee and delicious sweet breads. Muffins are quick and easy and go perfectly with a cup of steaming hot coffee. What could be more tasty than these Apple Spice Muffins?

APPLE SPICE MUFFINS

¾ cup milk
1 egg, beaten
¼ cup melted fat
2 cups unsifted flour
½ cup sugar
1 tablespoon baking powder
½ teaspoon salt
1 teaspoon cinnamon
1 cup finely chopped apples
¼ cup raisins

Add milk to egg, stir in fat. Mix dry ingredients thoroughly. Stir in apples and raisins.

Add liquid mixture and stir just until most of the dry ingredients are moistened. Do not over mix; leave batter lumpy.

Fill greased muffin pans ⅔ full Bake at 400 degrees (moderately hot oven) 20 to 25 minutes until golden brown.

Mixing the ingredients and then the topping in one bowl and spreading the muffin batter in a square pan are real early morning time-savers If even a basic cereal breakfast is a rush, you can grease the baking pan and measure all the ingredients the night before. Serve Crunch Topped Muffin Bread warm and fragrant from the oven.

CRUNCH TOPPED MUFFIN BREAD

1 cup corn flake crumbs
1 cup milk
1 egg
¼ cup soft shortening
1 cup sifted regular all-purpose flour
3 teaspoons baking powder
½ teaspoon salt
¼ cup sugar

Combine corn flake crumbs, milk, egg and shortening; beat well. Sift together flour, baking powder, salt and sugar. Add to crumbs mixture, stirring only until combined. Spread in greased 8 x 8-inch baking pan. Sprinkle with Corn Flake Crumbs Topping . Bake in moderately hot oven (400 degrees) about 25 minutes. Cut into squares to serve.

CORN FLAKE CRUMBS TOPPING

½ cup corn flake crumbs
¼ cup sugar
½ teaspoon cinnamon
2 tablespoons butter or margarine, melted

Combine all ingredients; mix well. Sprinkle over Muffin Bread before baking, pressing lightly into batter.

BLUEBERRY KUCHEN

1⅓ cup corn flake crumbs
1 cup brown sugar, firmly packed
4 teaspoons cinnamon
⅓ cup soft butter or margarine
½ cup chopped nutmeats
1 package (1 pound 4 ounces) white cake mix
1¼ cups (12 ounce package) frozen blueberries, thawed or fresh blueberries

Combine sugar and cinnamon; cut in butter until mixture is like corn meal. Toss in corn flake crumbs and nutmeats. Prepare cake mix according to package directions. Sprinkle one-half crumbs mixture over bottom of greased 13 x 9-inch pan. Spread cake batter evenly over crumbs. Sprinkle with drained blueberries and remaining crumbs mixture, pressing lightly into cake batter. Bake in moderate oven (350 degrees) about 45 minutes or until done. Cut into squares and serve warm or cold.

ORANGE BROWN AND SERVE ROLLS

Sweet Yeast Dough:

1 package active dry yeast
¼ cup warm water
1 cup milk
¼ cup (½ stick) butter
3 tablespoons sugar
1 teaspoon salt
1 egg, beaten
3 to 3½ cups regular all-purpose flour
Butter, melted

Orange Filling:

1 cup orange juice and pulp
1 cup sugar
¼ cup (½ stick) butter
1 teaspoon grated orange rind

To prepare Sweet Yeast Dough: Sprinkle yeast over warm water; set aside. In a saucepan scald milk; add butter, sugar and salt. Stir until butter melts and sugar dissolves. Pour into mixing bowl; cool to lukewarm. Stir in dissolved yeast and egg. Add 2 cups flour; beat well. Gradually stir in enough remaining flour to make a soft dough. On floured surface knead dough until smooth and satiny. Place in buttered bowl, brush with melted butter, cover and allow to stand in warm place until doubled (about 1 hour).

To prepare Orange Filling: In a saucepan combine orange

juice and pulp, sugar, butter and orange rind. Cook over medium heat, stirring occasionally, until mixture thickens (232 degrees F on candy thermometer). Cool Divide dough in half. On lightly floured surface roll half to measure 8 x 24 inches. Spread with half of Orange Filling. Roll lengthwise as for jelly roll Cut in 1½ inch slices and place, cut side up, in buttered muffin cups, 2½ inches in diameter Brush with melted butter. Repeat with second half of dough. Cover and let stand in warm place until doubled. Bake in preheated 375 degree oven 10-12 minutes, remove immediately to wire rack to cool Store in freezer or refrigerator. To serve reheat in 375 degree oven until golden brown. Makes 2½ dozen rolls.

ORANGE NUT BREAD

3	cups flour
4	teaspoons baking powder
¼	teaspoon salt
1	cup sugar
½	cup chopped peanuts
1	egg, slightly beaten
¼	cup orange rind, grated
1	cup orange juice
⅓	cup melted shortening or salad oil

Sift flour; measure, add baking powder, salt and sugar. Sift together. Add peanuts. Mix orange juice, rind, melted shortening and egg; beat. Pour into dry ingredients and mix just to moisten. Do not beat Turn into greased loaf pan 9½ x 5½ x 3. Bake in moderate oven 350 degrees about one hour or until done. Remove from pan Cool. Slices better on second day. Delicious served with cream cheese.

A father we know says he's sick and tired of arguing with his son over borrowing the car. "Next time I want it," he says, "I'm just going to take it"

Ladies, Have You Heard? . . .

Some Basic Facts About Cookies

For **rolled** cookies it's important not to work excess flour into them for toughness results. It's wise to work with just part of the dough at a time, keeping the rest chilled Roll dough to the desired thickness. The thicker the cooky, the softer the texture. After baking and cooling, you can decorate rolled cookies with confectioners' sugar frosting.

With a roll of **refrigerator** cooky dough, it's easy to have freshly baked cookies within a short time. Form the cooky dough into rolls, wrap rolls in waxed paper, and chill until firm enough to slice. You can store the rolls in the refrigerator several days and bake cookies as needed For extra flavor and eye appeal, roll the chilled dough in chopped nuts or toasted coconut before slicing and baking.

Dough for **pressed** cookies must be pliable so you can force it easily through the press on ungreased baking sheets. Bake pressed cookies until set The decorative shapes are attractive in themselves, but if you wish you can sprinkle the unbaked cookies with colored sugar or cinnamon sugar.

Keep Clothes In Repair

Your clothing has a great deal to do with the way people react to you. Clothes tell about your age, job, wealth, taste, and position in the community. Be sure they say what you want them to say.

A slip that shows, rundown heels, buttons dangling by loose threads all make you look careless.

Do minor mending jobs right away.

Sew on a button before it falls and is lost.

Take time to check all the minor details of your appearance before leaving the house.

Solid Furniture

Solid furniture is just what the name implies — the same wood is used throughout, at least on all exposed parts of furniture.

Solid wood may be carved, turned, or grooved.

If the furniture becomes scratched or chipped, you can refinish it.

Solid wood has a tendency to warp or crack

Read the label on furniture you buy to know the type of service you can expect from that piece of furniture.

PREVENT RABBIT DAMAGE

Cottontail rabbits sometimes cause winter damage to young trees and shrubs by chewing the bark. Home-owners can prevent damage by using hardware cloth cylinders, layers of heavy waterproof paper or aluminum foil, says Robert G. Wingard, extension forestry and wildlife specialist at Penn State University.

YOUR 1968 CALENDAR IS AVAILABLE

FEED CATTLE FASTER AND MORE EFFICIENTLY THAN EVER BEFORE!

NOW! Feed up to 200' of bunk per drive . . . Feed multiple lots . . . Blend complete rations with . . .

VAN DALE'S NEW AUTOMATIC MULTI-FEEDERS

From the pioneer in silo unloading, come two low-power, mammoth capacity, bunk feeders for in-the-barn or feedlot feeding. You can feed from more than one silo (at the same time). Feed out to from one to four-or-more lots. Feed any material with big 9" or 12" true, bearing-suspended augers, (no metal-to-metal contact.) Feed entire bunk at one time; eliminate crowding.

High capacity and dependability . . . call us and we'll come out to see you, at your convenience.

HOLSTEIN COWS and Farm Equipment

SATURDAY, DEC. 30, 1967

10:30 A.M.

Location: 5 miles northwest of Coatesville, 4 miles east of Compass, 7 miles southeast of Honey Brook along the Sandy Hill to Martin's Corner Road, Chester County.

Complete milking dispersal of 36 Holsteins of which 4 are registered, T.B. and Bangs tested, 30-day tests made. 20 were fresh summer and fall, a number due by sale or later, many are young cows or first calf heifers. They are by popular artificial sires or granddaughters of Ivanhoe and granddaughters of Greenwoodmaster. Owner-sampler records, a sample of what is selling:

Jane	365 da.	19,035	636	3.34%
(her granddam has 2 records that averaged 23,249 milk)				
Betty (Dean)	365 da.	17,641	687	3.89%
Virginia	305 da.	14,630	605	4.14%
Sunbeam	344 da.	14.824	654	4.41%
(2 yr. old)				

4 others sell with 16,000 to over 18,000 milk records. Your inspection of this herd is invited, catalogs, sale under cover.

Following Farm Equipment:

425 gallon Esco "approved" tank, like new, with 12 volt system;

1000 lb. Delaware Valley milk base, and other farm equipment.

HAY, STRAW, CORN by the ton

Order of sale, tools, equipment, cattle.

WHY? YOU ASK?
WHY SHOULD YOU LIST YOUR COUNTRY PLACE, FARM, LAND OR LOTS WITH WENTZEL?
Because Wentzels have many waiting city buyers who many times pay higher prices than your local buyers; because everybody knows Wentzel advertises regularly; Wentzels help arrange financing; Wentzel has a whole barn-full of ex-farmer boys (now skilled negotiators) to help sell your present place more quickly and efficiently and to help you buy or build your next home. Phone 394-3763 today.

REALTOR, STANLEY M. WENTZEL
401 W. Orange Street, Lancaster

● Animal Nutritionist

(Continued from Page 1)

The nutritionist said it cost $4 40 to produce milk

He also listed coconut oil as costing 20 cents a pound whereas butterfat cost 80 cents And if they can find a way to use soybean oil they can get that for 12½ cents a pound

Another point made by the Agway man was that the dairy manufacturer doesn't have to put in different equipment to produce it. "And it is as good nutritionally as whole milk," he said

Dr Dolge listed four ways farmers can cope with this problem: (1) through research to find new products to increase milk use; (2) through advertising milk to push sales, (3) take a look at the laws — not try to outlaw the filled milk but look for laws that help sell milk, and (4) decrease the cost to produce the milk "We have to do everything possible to cut costs in production because of the filled milk problem," he concluded

A similar meeting was held at the Quarryville Fire Hall Tuesday evening

Pioneer Co. Honors Thirty-Year Salesmen

The Pioneer Corn Company, Tipton, Indiana, honored seven local salesmen for thirty years of service to the company at the Christmas Sales meeting held at the Reading Motor Inn, last week

Those honored were Eugene Hall Charles Ricedorf, Clyde Eshelman Martin Snyder, Paul Denlinger, Bob Heisey and Ammon Shelly

The meeting also marked the 30th anniversary of the Pioneer Corn Company according to John Weidman, Eastern Regional Sales Manager

At the meeting Floyd Collins Director of Sales, told of the growth of the company and pointed back to 1937 when the sales covered a three state sales area and then looked at the growth to an outstanding sales area Collins credited the present and the twenty state staff and a product which can and the many new hybrids being developed for the future speak for itself He also spoke about the research department

LOCAL PIONEER SALESMEN who were honored by the corn seed company at a recent meeting. (left to right) Front row, Eugene Hall, Charles Ricedorf, Clyde Eshelman and Martin Snyder. Back row, Floyd Collins, Sales Director, Paul L. Denlinger, Bob Heisey and Ammon Shelly.

CHRISTMAS

As we gather together on Christmas morn to worship the Christ Child and offer Him the gift of our love, let us all recall especially the message of the angels announcing His birth: Peace on Earth, Good Will to Men. We heartily wish that all the blessings of the holy season of Christmas come to you and your family in lasting measure throughout the coming year.
